ABSTRACT

BitYaar is a global economic corporate Profit-sharing and Crypto-currency Exchange platform, comprises an ecosystem and variety of financial application and payment networks.

This will change the way people in Africa look at finance and investments. BitYaar brings the solution to the unsolved financial problems in Africa Countries. This whitepaper will be constantly updated with every minute details that the user needs to know before getting enrolled into BitYaar's project.

This is merely a detailed explanation of BitYaar's product and chain rather than a marketing document. With the advent of blockchain and cryptocurrency, the flow of traditional investment and financial systems was disrupted. Finance is the perfect use case of cryptocurrencies. It has not failed to bring a revolution in the finance sector.

Problem statement

African firms and start-ups are slaughtering many talents to position themselves on the global market, but they could not achieve it due to the lack of proper financial means. The major reason that disintegrates Africa from commercial globalization is the difficulty in buying Bitcoin or other altcoins at international market prices. A proper means of finance is the need of the hour for people in Africa that offer them financial stability and independence.

BitYaar solution

BitYaar introduces transparency into the existing financial systems in Africa by integrating blockchain technology, to facilitate the creation and growing African companies, to open up to the international market through the digital economy for more competitiveness and by extension, a more valuable economic growth. Faced with the advent of digital technology, which is becoming inescapable in all sectors of activity, African companies will gain by turning to stock market speculation in all its forms. In addition to this, BITYAAR offers other services that are innovative solutions to lead companies in their daily development.

Mission

BitYaar nourishes new ideas and innovation within the African market. It helps firms gain attraction and raises funds to increase their activities . This allows the investors to get a good return on investments in the long term. BitYaar will build a world-class corporate profit sharing and crypto currency exchange, powering the future of industrialization in the whole of Africa.

Vision

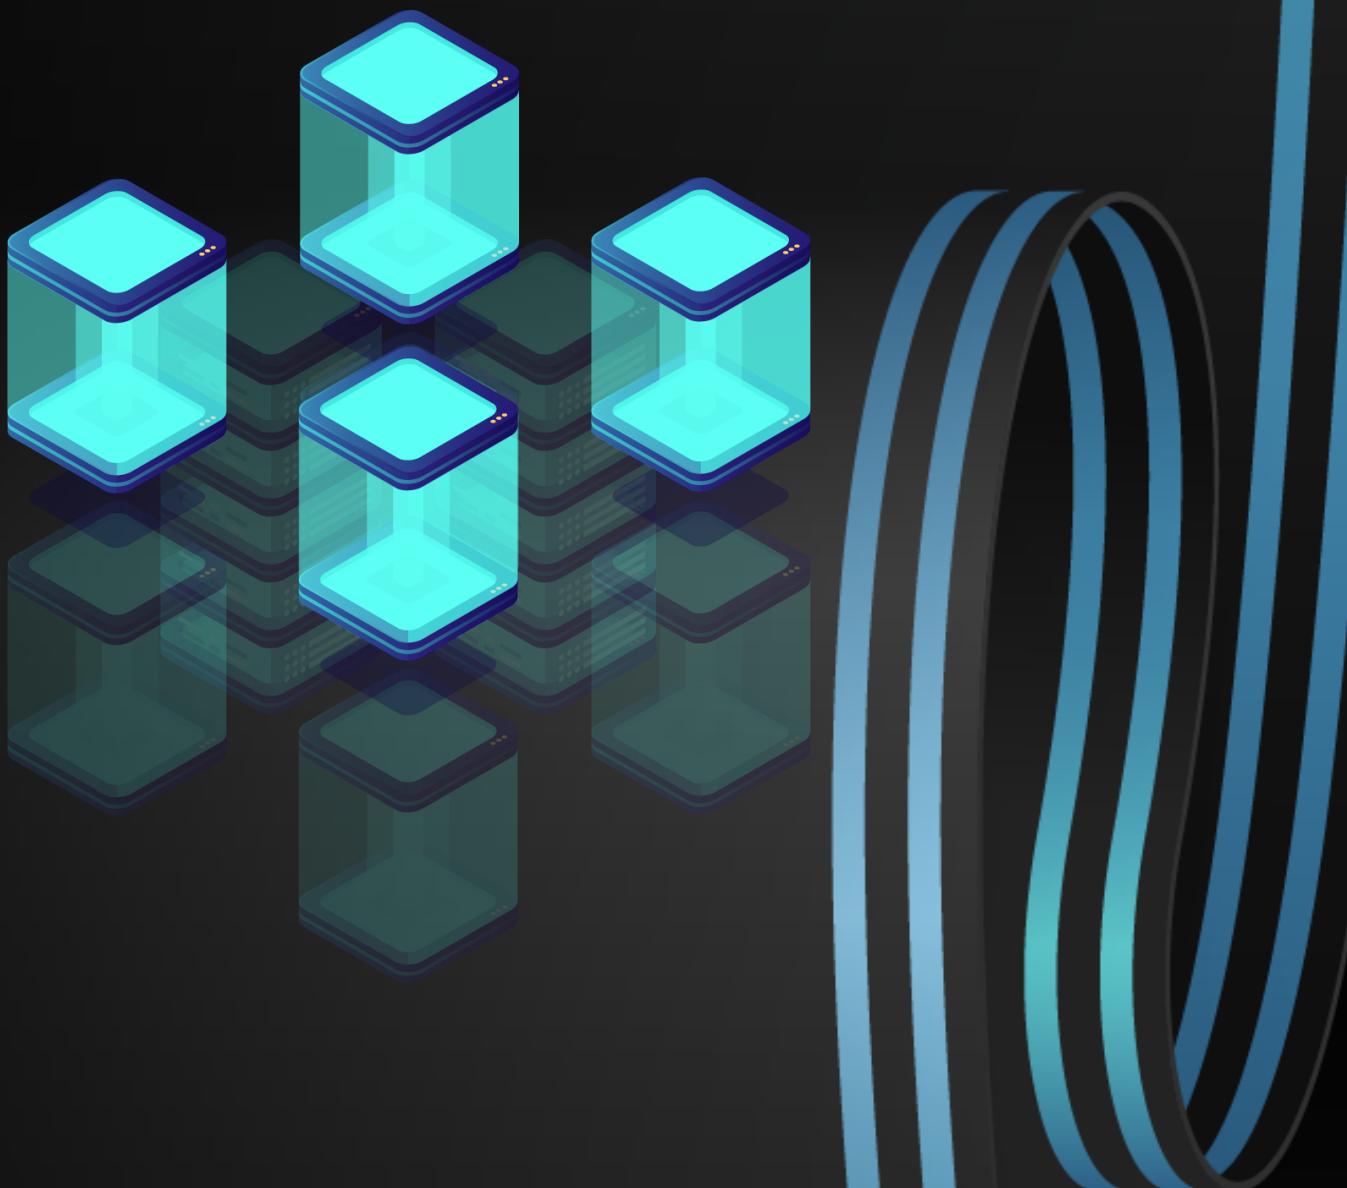

BitYaar has for vision to boost the african economy by facilitating the access of financial assets and to issue solution on technology innovation via it's platform . To generate start up in all activities sector and make them very competitive and productive for the profit growth.

BitYaar Chain Explained

Lack of transparency is one of the significant issues in the current financial systems. BitYaar provides enhanced transparency in its financial applications with the integration of the BitYaar Chain. It will act as a portal for developers who can use it to create dApps (decentralized applications) through its smart contracts. BitYaar chain operates in a decentralized fashion, with transactions occurring between peers worldwide without an intermediary. This significantly reduces the operating cost and processing fee associated with the network.

Better Transparency

BitYaar chain has its consensus mechanism like any other blockchain. The consensus mechanism is nothing but the set of protocols that are used for the validation of transactions. If a block has to be added in the BitYaar chain, it has to be validated by the peers in the network. This method of validation is called a consensus mechanism. So, when data are recorded on the BitYaar chain, there is no room for fraudulent activity. Also, the BitYaar community members can enjoy complete control over their assets.

Enhanced Security

BitYaar outperforms other record-keeping systems in Africa with the bestspoke use of technology. Every transaction is stored in a block. The transactions are linked through hashing mechanisms, i.e., every transaction is connected, ensuring traceability. BitYaar transactions are irreversible. They cannot be undone or stopped in the midway by anyone for any reason, making it one of the best payment systems in Africa. Also, data stored in the BitYaar chain is immutable. These immutable ledgers are the right choice for any finance application.

BitYaar chain improves efficiency and speed

A traditional bank transfer requires 2-5 business days to process. But BitYaar chain helps the users make lightning-fast transactions. The transactions would hardly take 30 seconds, depending on the network congestion or traffic. The gas fee is also very meager. With BitYaar, people in Africa enjoy online purchases and cross-border payments in a seamless way.

BitYaar Exchange

BitYaar Exchange makes it easy for traders to get started. The exchange is very genuine and secured as the KYC is mandatory when you have to withdraw more than \$ 10.000 / day. With Bityaar, the data you submit for KYC is very safe and confidential. There is no room for a data breach. BitYaar exchange also supports the listing of physical enterprise shares and it is based on profit sharing protocol.

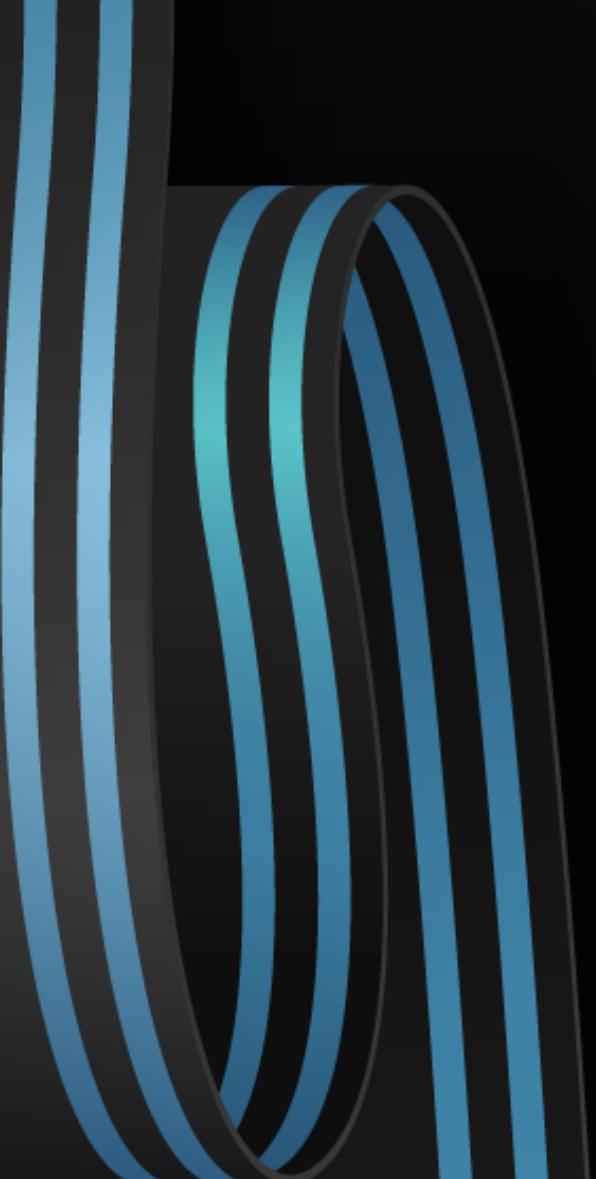

Bityaar offers consistently high liquidity. Liquidity is nothing but the ease of buying or selling an asset. BitYaar lists almost all the leading corporate profit sharing and cryptocurrencies project in the market and makes it easy for investors and traders to get access to more opportunities. Fast transaction speed on BitYaar exchange contributes to better users experiences as well as enables complex trade types.

BitYaar's perfect matching engine

If you are selling an asset, there is a need for the buyer at the other end, and the orders are maintained on the order books until the right match is found. BitYaar has a sustainable and powerful matching engine capable of matching 5,700,000 orders/second, making BitYaar one of the fastest exchange in the market. BitYaar's matching engine is never overwhelmed.

BitYaar exchange will roll out some features like spot trading, margin trading, futures trading, stock trading, and instant exchange of crypto assets. BitYaar exchange whitelists coins that have strong credibility, user base and liquidity. More coins will be added over time. BitYaar will also implement Profit sharing.

BitYaar's profit-sharing protocol explained

Profit Sharing is an incubator that aims to raise funds to finance projects with proven returns and the profits will be redistributed periodically (monthly, bi-monthly, quarterly, semi-annually or annually) to investors and project owners over the long term.

It is an opportunity open to investors from any country in the world and to good project holders. BitYaar has a review and monitoring committee that monitors profit-sharing projects to ensure proper project management and transparency.

BitYaar community members can directly involve the firms' affairs by buying their shares listed on the BitYaar. When the company shows good performance and outcomes, the profit will be shared among the investors who own the company's shares. BitYaar guides the investors by offering the shares of the right companies to skyrocket their returns in the future.

BitYaar Start-up

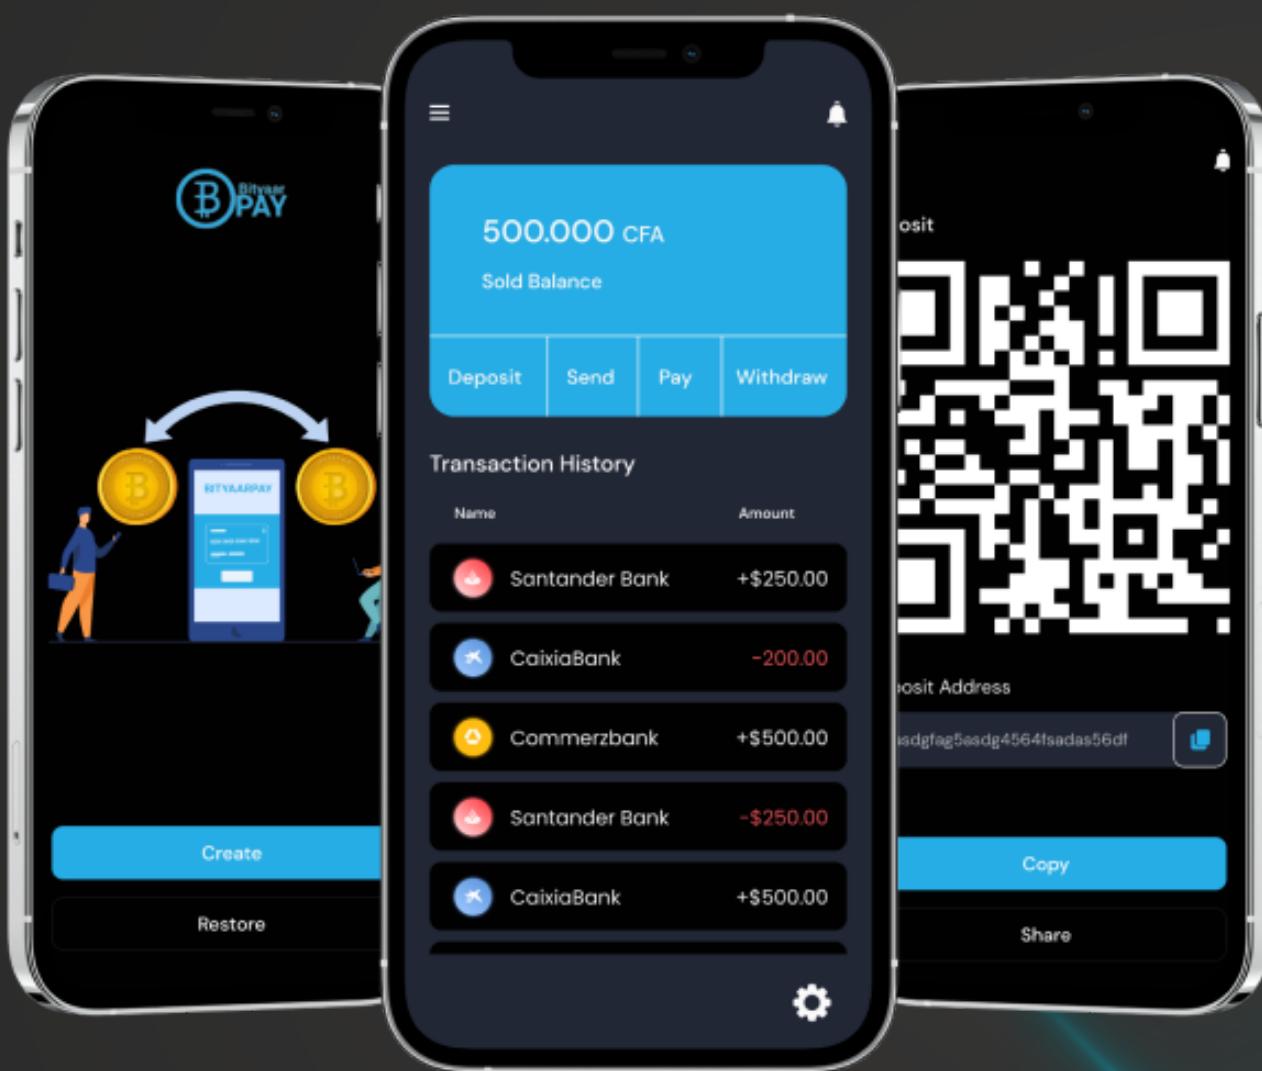

BitYaar startup is an innovative idea that helps the investors and BitYaar community members to be part of the game-changing future projects. BitYaar's startup is an IDO platform that lists the potential projects in the cryptocurrency and DeFi space. The idea is to nurture innovative ideas by bringing them to the notice of crypto enthusiastic society.

The project owners can list their projects in the BitYaar startup and focus on the development part without worrying about the project's reach. BitYaar's startup helps potential projects gain exposure and raise funds. The tokens of the projects are launched worldwide transparently and securely.

BitYaar Pay

With BitYaar Pay, sellers and merchants in Africa can start accepting crypto payments for their businesses. By doing so, they attract huge customer base around the globe as BitYaar Pay make borderless payments easy and a very insignificant fee. The sellers can take their products and services to the global market. Receiving payment is so easy that all you have to do is share your Bityaar Pay address to the sender. You can seamlessly spend with BitYaar Pay in the BitYaar ecosystem with the click of a button.

BitYaar staking protocol

When you hold crypto assets in the BitYaar exchange, they do not remainidle instead, BitYaar staking protocol makes them work for you. The staked coins or assets are used to support the operations of the BitYaar network. Participants are rewarded for depositing and holding coins, with constant, guaranteed time-based returns. Rewards are calculated based on staking time: the longer you stake, the more you earn. Staking is a less resource alternative for mining. When you are getting your feet wet with cryptocurrency, you cannot indulge yourself in mining or trade as they require proper research and market trend analysis.

How Profit-Sharing Works?

BITYAAR PROFIT SHARING

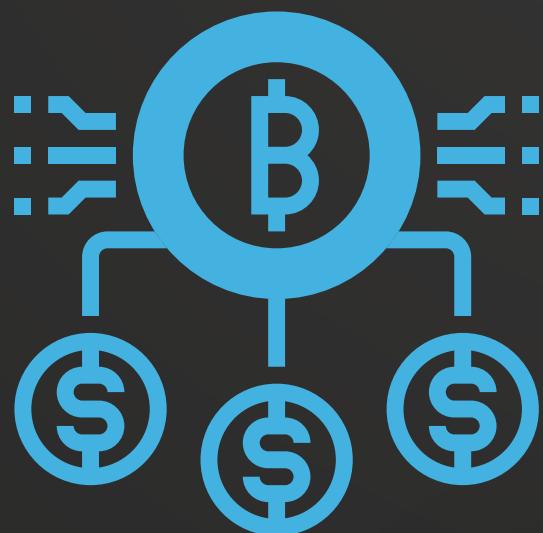

WE ARE BITYAAR THE GAME CHANGER

Device coverage and Multilingual support

BitYaar provides cross-platform trading for

- Web-based trading client
